

# EDUCATING THE WHOLE CHILD BEFORE THE ACADEMIC CHILD

This talk will inspire attendees to consider our roots and what our children will need 10, 15, 20 years ahead. Strong and healthy RELATIONSHIPS is what we and the future will require. We have focused on Bullying Prevention as being a PRIORITY, now let us speak of Healthy Relationships as being the most important aspect of educating our children. Children learn best, and live longer when they are satisfied and secure within their relationships. Then, and only then will our money be well spent on academic materials and learning. We will see our students succeed.
